Use-Case Specification: Update Manga

1. Update Manga

1.1 Brief Description

- This use case describes how the approved user fixes the manga information .

2. Flow of Events

2.1 Basic Flow

- **Step 1:** At the view profile page, the approved user clicks the “Manage manga” button which is next to the avatar.
- **Step 2:** System displays the manga management page.
- **Step 3:** Users search for the available manga on the searching bar.
- **Step 4:** System displays the result.
- **Step 5:** Users click to the result that they are looking for.
- **Step 6:** System displays the management page of that manga.
- **Step 7:** Users click at the “Edit chapters” button. In addition, users can fix the information that they want (edit author name, manga genre, post new chapter or delete old chapter).
- **Step 8:** The information display system has changed.
- **Step 9:** User clicks the “Save” button.

2.2 Alternative Flows

- Alternative flow 1: Chapter information was filled invalid.

1. From #9 of the basic flow, user re-fill chapters information that was invalid.
2. Continue step #9.

- Alternative flow 2: Manga name was typed wrong or invalid.

1. From #3 of the basic flow, users search again for the right manga name (or the published manga name).
2. Continue step #4.

- Alternative flow 3: Users want to delete only some chapters, comments

1. From step #7 of the basic flow, users look for the chapter/comment that they want to delete. Admin can also delete comments.
2. Users click at the delete button next to that chapter/comment.
3. Continues step #8.

- Alternative flow 4 : Users want to fix the content of the chapters

1. From the #9, users access the chapter that they want by clicking at the chapter.
2. System displays the chapter page.
3. Users fix the content of the chapters.
4. Users click the “Save” button.
5. System displays the new manga pages.
6. Continue step #9.

3. Special Requirements

1. Legal and Regulatory Requirements:

- Manga must comply with copyright laws and regulations.
